

To Whom It May Concern,

I feel that The National Association of Broadcasters (NAB), is making enough money with their commercial broadcasting and I highly prefer XM Radio for it's commercial FREE listening environment, the reason I purchased XM in the first place was to rid myself of the COMMERCIAL ENVIRONMENT of regular broadcast radio.

XM radio offers many more choices in my local area for the music I prefer including weather, traffic and NEWS.

Please inform the NAB (Congress and the Federal Communications Commission) that they are trying to suppress or limit XM's or Satellite radio's ability to provide you with "locally oriented" content, including the new XM Instant Traffic & Weather channels.

An after thought is IF the NAB is protesting NOW they should have introduced Satellite radio themselves since they apparently are regretting their decision to NOT initiate their own Satellite radio system.

Positively Satellite radio oriented customer,

Kenneth Strasser, Colorado
